MOKE

by Mini Sport

Californian

...is back!!!

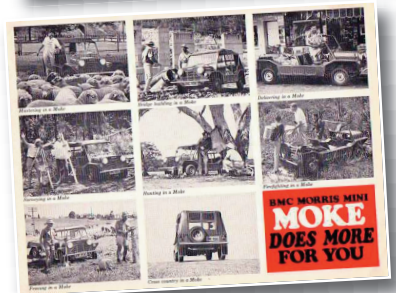

Remember the Moke?

That funky, little open topped personality on four wheels that used to be seen hammering around the roads of the UK in the 1960's, the dusty roads of the Australian Outback and the potholed corners of many sun-drenched tropical Islands...

...well, it's back!!

Mokes are inexpensive, stylish, fun, functional, unique and is custom made to your individual specification and lifestyle.

Available in a choice of nine vibrant colours with many extras available.

You know you want one...

The Moke is based
completely on the Mini

After a 15 year absence, the Moke is back, a wonderful addition to the Mini scene that Mini Sport are proud to be involved in.

The Original Moke, was designed and the first prototype was built back in 1959 by Sir Alex Issigonis. A derivative of the Mini brand, with which it shared many parts, was to fulfil a need in the British forces. Unfortunately, it was not deemed to be practical for there needs, due to the low ground clearance, but in 1964 the Moke was put into production by BMC at there Longbridge factory, for the public to buy through the dealer network.

In 1966 the first Australian Mokes were produced in Sydney and production continued until 1982, when the factory was sold. The following year 1983, production had been transferred to Portugal, and although not exactly the same as the Australian Moke, they were very similar. Production continued until 1989, when the company was sold to Cagiva in Italy, who continued with production of the Portuguese Moke until 1993. The New Moke is based on the Australian & Portuguese Mokes, it has a fully Galvanised body that is built to the highest quality, guaranteeing many rust free years.

The running gear and brakes are as standard on a Rover Mini, with disc brakes to the front and drums to the rear. The suspension is also as standard on the Rover Mini, with the

addition of the fantastic Moulton Smootha Ride Kit, making it a wonderful vehicle to drive and ride in.

With a Brilliant Colour range to finish, the new Moke has all the ingredients to put a smile on your face.

The involvement of Mini Sport is to develop and distribute the Moke throughout the UK, Ireland & Europe. We have the technology, ability, enthusiasm and experience, gained over 40 years in business with the Mini, to provide the complete Moke experience.

Specification:

This Moke is available to purchase in two ways.

Option 1:

Build yourself kit, ideally using a Mini as a donor vehicle.

Option 2:

Rolling shell, requiring only complete engine and gearbox to run.

Chassis:

Galvanised steel bodyshell in a choice of 9 colours, based upon the Australian and Portuguese Mokes.

Engine & Gearbox:

Mini Inline 4 cylinder A+ or A series, from 850cc to 1275cc (not supplied)

Steering & Brakes:

Rover Mini standard front disc type and rear drum type brakes. Rover Mini standard steering rack and column.

Suspension:

Rover Mini standard suspension system using front and rear subframe with Mini Sport Moulton Smootha Ride.

Wheels & Tyres:

13" Moke Alloy wheels fitted with 165/65R13.

Exterior & Interior:

Fully retractable fabric hood with four removable door flaps. Safety roll over bar. Four seats (front slide, rear fixed)

MOKE KITS

Build your Own Kit

This extensive Moke kit has been specifically engineered for the "hands on" enthusiast, who finds as much enjoyment in the construction as the driving.

We suggest using a Mini donor vehicle for your build allowing straight forward transfer of the brakes, suspension, engine and gearbox. This will also assist when registering the vehicle as the logbook can be easily updated.

Each kit comes with everything illustrated below and listed opposite, along with indicator lamps, rear brake lights plus all bolts and fixings to build your kit.

Optional Extras:

All these extras can be purchased from Mini Sport either as parts or assemblies.

Brakes & Disc Drive Assemblies
Suspension & Shock Absorbers
Engine, Gearbox & Ancillaries
Headlights and Wiring Looms
Seats & In Car Entertainment
Wheels & Tyres
Heater system
plus many more
styling accessories
